Portfolio: <https://tavakoli-code.github.io/portfolio/>

SKILLS

Backend Development: NestJS, Node.js, Express.js, PHP

Database & ORM: PostgreSQL, MySQL, Prisma, Microsoft Access

Authentication & Security: JWT, OTP, 2FA/MFA, RBAC, permission-based access, logout policies

Infrastructure & Tools: Redis, Docker, Swagger, Git, VS Code

Programming Languages: JavaScript, TypeScript, Python, Java

Other Skills: API design, database design, validation, file handling, background jobs, webhook security, notification systems, KYC workflows

EXPERIENCE

Shafaf Hub, Kabul — *Backend Developer*

DECEMBER 2025 - PRESENT

Working as a backend developer with the Shafaf Hub team on a payment system. My work focuses on building secure and production-ready backend features, including API standards, versioning, authentication and authorization, role-based access control, multi-tenancy, KYC workflows, notifications, file handling, background jobs, provider integrations, webhook security, and customer payment-related services.

Shams High School, Kabul — *Computer Teacher*

MARCH 2025 - DECEMBER 2025

Amoozgar Educational Center — *Computer Teacher*

2023 - 2025

Worked as a computer teacher, teaching students practical computer skills including ICDL topics such as Windows, Microsoft Word, Excel, and PowerPoint, as well as introductory Python programming. This role helped me strengthen my ability to explain technical concepts clearly, guide students step by step, and make technology easier to understand for beginners.

Independent Projects — *Full-Stack*

JANUARY 2023 - DECEMBER 2025

Built and practiced different real-world software projects, including learning systems, blog applications, student management tools, and database-based educational management systems. These projects helped me improve my backend development, database design, API structure, authentication, validation, and problem-solving skills.

EDUCATION

Avi Cenna University - Kabul, Afghanistan — *Bachelor*

2019 - 2023

Studied core computer science topics including software engineering, database systems, data structures, algorithms, and object-oriented programming using languages such as Java, C++, and Python.

The Complete Full-Stack Web Development Bootcamp — **Udemy**

Dr. Angela Yu / The App Brewery

Currently completing practical full-stack web development training covering HTML, CSS, JavaScript, DOM manipulation, Git/GitHub, Node.js, Express.js, EJS, REST APIs, PostgreSQL, authentication, React, deployment, and introductory Web3/DApp development.

AWARDS

First Position of the Semester — **Avicenna University, Fall 2021**

Recognized for academic excellence in the Faculty of Computer Science, Software Engineering Department.
